

Zero Beat

Our 40th ARRL affiliated year
Special Service Club

Hampden County Radio Association, Inc.

Serving Greater Springfield, MA

February Meeting

Plan to bring a potential novice with you to the February Meeting. The new film "The New World of Amateur Radio" will be shown.

There will also be informal discussions of how to get involved with amateur radio.

A transceiver will be set-up for all those who are interested in working the club special events station W200NY. This should be a great way to introduce a new friend to Amateur Radio, and at the same time work W200NY. Special full color QSL's will be printed for the event.

ARRL books including Tune in the World and License Manuals will also be available for purchase at the normal club discounts.

Please plan to stop by, and bring a friend!

New Novices

Jack LoMonaco WA1YYK reports the result of a recent HCRA Novice class, with the following new hams recently receiving their calls:

KA1RJA Mike Griffin

KA1RJB Ed Gingras

KA1RJC Howard Jawsnia

If you hear these guys on the air give them a warm welcome!

Service Master

Drapes cleaned in place in your home! Carpet and furniture cleaning! Call the office and mention my name. Questions? Call me at home at 413.786.7856

Jeffrey Duquette K1BE

February 1988

The Results

Its over, and some preliminary results are in. From what we have received todate, your club station W1NY placed **THIRD** in the country, with its highest score ever! The record breaking score was accumulated by operators: W1KK, NC1I, N1DPM, K0ZK, WA1UQC, AC1T, K1TOL, K1WHS, N1AEH. Through months of hard effort, and hours of steady manning of the station, W1NY has accomplished a major feat! Kudos to all who assisted in the setup and operation of the station. The operators would also like to thank other hams in the area who provided numerous contacts to help W1NY reach new heights.

Here is a breakdown of some of the scores we've received here at Zero Beat. Please remember that these are preliminary scores, and some adjustments may occur prior to publication in QST. The numbers are: the band, QSO's, and grids worked.

License Manuals

Quite often the HCRA receives questions regarding the status of ARRL License Manuals, which are available through the HCRA. The October 1987 issue of QST contained an article by Bruce Hale, KB1MW, ARRL Assistant Technical Editor. The following information was extracted from that article for your convenience. You can refer to QST or request a copy of the reprint by sending an SASE to the ARRL, 225 Main Street, Newington, CT 06111.

The following table indicates the current license manuals:

pools would be revised on a three-year cycle. The Extra pool would be revised in 1987, followed by the Novice and Tech pools in 1988, and the General and Advanced pools in 1989. After the revision is complete and a pool is released, publishers have nine months to revise their study materials before the new pool is actually used for tests.

Hence the present license manuals will be correct until the question pools are revised and the VECs begin to use the new pools on exams. This means that the editions shown in the above table will be current until about six months after the new pool

revision in 1989. New editions of these manuals should be out sometime in August or September 1990.

The HCRA has all the current editions of the ARRL license manuals, which are available at all club meetings, or by writing to the club address.

.....

W200AW Report

It was a great honor for me on 10-Jan-1988 to operate from League HQ as W200AW. The response on ten meter ragchew net was fantastic. Now I know what its like to be on the other end of a pile up. I want to thank Joe, NA1X, for taking a list so that everyone who wanted could be

<u>Element</u>	<u>Class</u>	<u>Current License Manual*</u>
2	Novice	Tune in the World with Ham Radio, Seventh Edition
3A	Technician	Tech/General License Manual, Third Edition Second Printing
3B	General	Tech/General License Manual, Third Edition Second Printing
4A	Advanced	Advanced Class License Manual, Second Edition Second Printing
4B	Extra	Extra Class License Manual, Second Edition Second Printing

* Minor updates, undertaken when the supply of manuals begins to run out, are called new printings of the existing editions. Generally, a new printing of an existing edition does not make the older printings of that same edition obsolete.

Its most important that you use the current edition, than that you have the most current printing. New printings usually contain very minor corrections of typographical errors, while new editions reflect changes in the question pools.

Until 1987, the FCC was responsible for updating each question pool once a year. Of course, this required that the study materials also be updated on a yearly basis. Now, Volunteer-Examiner Coordinators are responsible for updating the question pools. The VECs decided at the VEC conference in July 1987 that the

for that license class is released to publishers.

A new edition of the Extra Class manual should be out in August or September of 1988. A new edition of Tune in the World may be out in August or September of 1989.

The Tech/General manual will be divided into two separate manuals (one manual for Tech and a separate manual for General) also in August or September of 1989. Until then, the ARRL will continue to publish one manual containing both Element 3A and Element 3B pools.

Element 3B General, and Element 4A Advanced, are scheduled for

worked. Also want to thank the people for standing by while I used the repeaters listed. Anyone wishing a QSL should send their QSL and a SASE to W200AW, care of the ARRL, 225 Main Street, Newington, CT 06111. What follows are my totals for the 3.5 hour operation.

73, [s] Rusty Hack NM1K

<u>Operation</u>	<u>QSO's</u>
10m ragchew net	55
75m phone	61
80m CW	102
40m CW	41
2m sideband	60
2m FM simplex	15
2m FM 146.91/R	65
2m FM 146.79/R	41
2m FM 147.00/R	33
2m FM 146.94/R	2
Totals:	474

Fill It Out!

Now that the 1988 ARRL January VHF Sweepstakes is over, you can sit back and relax - almost! If you have not completed your VHF Sweepstakes summary form, please do so now, and send it in directly to the League! The following steps should walk you easily through the process of filling out this form. It may look a bit complicated, but just follow these simple directions.

- 1 Fill in the boxes at the top of the form. Indicate the call you used during the contest; the grid square you gave out, and the ARRL section you operated from. Most of you will use FN32 and WMA if you operated from western Massachusetts, while some of you will use FN31 and CT if you are south of the border.
- 2 Check one box under Station Categories. If you were a single operator station, and worked only one band, check the first box. Don't forget to indicate which band you operated! If you were a single operator station, and worked more than one band, then check the second box. Finally, if you were fortunate enough to have additional help, check the multiple operator station box, and list the calls of the other operators to the right.
- 3 Go through your logs, making sure you have no dupes. If you worked more than 200 people on a band you must submit a dupe sheet (list of calls worked) with your entry.
- 4 Count the number of contacts for each band, and write the count in the box in the QSO's column.
- 5 Count the number of grid squares you worked on each band. You may find it helpful to use the grid

square map in last month's newsletter to do this.

- 6 For each band you worked, write the count of different grid squares for each band in the Grid2 column.
- 7 Get a calculator.
- 8 Each QSO is worth a certain number of points, the higher the frequency the more points you get. For example 2m QSO's are worth one point (X 1) while 70cm QSO's are worth two points each (X 2). For each band you worked, multiply the number of QSO's by the amount indicated to the right, and enter the result into the QSO [points] box.
- 9 Now for each band, multiply the QSO [points] value (just computed) by the number of grid squares, and enter the result in the Score box.
- 10 Total the left hand three columns: QSO's, QSO [points], and Grid2. DO NOT total the score column; its computed in the next step.
- 11 Compute your total score. Multiply the Total QSO [points] by the Total Grid2, and write the result in the SCORE box. Remember, your total score is NOT the total of all the individual band scores, but the total number of QSO points multiplied by the total number of grid squares.
- 12 You're almost done! Date the form, sign it, and indicate your call.
- 13 Make sure you indicate your mailing address; the League may send you an award!
- 14 If possible, make copies of you logs, summary sheet, and dupe sheets (if any).

- 15 Mail your logs, summary sheet, and dupe sheets (if any) to the ARRL, 225 Main Street, Newington, CT 06111
- 16 Now sit back and relax!

HCRA VE Exam Schedule

The HCRA has enhanced its volunteer exam offerings with the inclusion of regular monthly exams on the west side of the river. In addition to the Saturday morning exams scheduled in Wilbraham, Wednesday evening exams will now be held in Agawam.

03-Feb-88	7:00 PM	West
02-Mar-88	7:00 PM	West
12-Mar-88	8:30 AM	East
06-Apr-88	7:00 PM	West
04-May-88	7:00 PM	West
01-Jun-88	7:00 PM	West
11-Jun-88	8:30 AM	East
10-Sep-88	8:30 AM	East
10-Dec-88	8:30 AM	East

First Annual HCRA AF Sweepstakes

Results of the 1st Annual HCRA AF Sweepstakes

The first annual HCRA AF Sweepstakes was held at the January 1988 club meeting. This event was a audio frequency contest to stimulate interest in the operation of the ARRL January VHF Sweepstakes. Prizes were awarded to the top ten scores.

The objective was to work as many people as possible in a thirty minute period. The exchange was your initials and month of birth. To make things interesting, you could work everyone twice: one location was called room A where the contacts were worth one point (a large room), and the other location was called room B where the contacts were worth two points (a very small room - the coat closet).

After the completion of the 30 minute contest period testers had to fill out the HCRA AF Sweepstakes Summary Sheet, and hand it into the awards committee. The committee verified all scores, and checked logs for dupes, etc. The awards committee consisted of N1DPM, KA1ZE, and KA1KPH. The scores for the 29 people handing in their logs are listed to the right.

WB1BZH	32	51	18	918	Ken
NJ1E	32	42	20	840	Bill

A total of 77 people turned out for the meeting, which was postponed from its original date due to bad weather. The meeting was rescheduled to the day before the contest and all members should have been notified by mail of the new date and time.

A very good presentation on VHF Sweepstakes contesting was delivered to the group by Stan KA1ZE and Fred N1DPM. The HCRA AF Sweepstakes followed the presentation, giving those in February 1988

attendance a chance to try out what they had learned. The awards ranged from an electric pencil sharpener and calculators to customized ARRL US maps with beam headings provided by N1DPM (we hope he signed each one of them!)

In addition to the 29 people who submit their logs for awards, there were many people who also gave out points. Thanks to all who participated. Who knows, maybe we'll do it again next year!

Thanks for the new multiplier...
